SOFTWARE ENGINEER

I am eager to learn, develop, and be part of the team. I started working in software development in the third grade of university. Since then, I have become part of many teams and many projects. In this new step of my career, I have confidence in my social and technical skills, and I am confident that I will bring value to both myself and your company.

EDUCATION

Istanbul Kultur University - Master Degree
Engineering Management

Nov 2023 - Present

Balikesir University - Bachelor's Degree
Computer Engineering

Sep 2017 - Sep 2021

EXPERIENCE

Codeventure
Frontend and Mobile Developer

Apr 2022 - Feb 2024

Codeventure is a software house that has developed Vigo, Joggo, Cornix, etc. My tech stack was based on JavaScript technologies. Mainly **React.js** and **React Native**.

- I had the opportunity to work with people and projects from different sectors.
- In a very short time, I got a chance to be part of the development of amazing websites and apps.
- I was on the core team of an app that downloaded more than 1 million people. I observed people's expectations of mobile applications.
- I was part of planning apps and communicating with customers. So I could improve my communication skills and see what customers expect from developers.
- Furthermore; I used **JavaScript, TypeScript, React.js, React Native, Next.js, Payload CMS, HTML, CSS, and Git**.

Likom
Frontend Developer

Nov 2021 - Apr 2022

Likom was founded in 1984, as one of the oldest software firms in Turkey. The company has multiple ERPs that more than 15.000 customers are using. I was part of the new ERP project team.

- I worked as a Frontend Developer and my responsibilities were developing new features and handling bug fixes.
- I accelerated the process by adding new features and completing tasks quickly.
- I got a chance to be part of a comprehensive project.
- Furthermore; I used **JavaScript, React.js, HTML, CSS, and Git**.

BEST is one of the biggest transformer manufacturers in Turkey. I was in the company's R&D team. The first 6 months were part-time, and due to the pandemic, I started working full-time.

- I got an opportunity to work full-time in the last year of university, school was remote because of the coronavirus pandemic.
- I worked as a Full-Stack Developer and during this time, I took part in the development of two projects from scratch which are being used actively in the firm. I got a chance to work with engineers from different fields. Besides these, I developed new features for existing projects.
- I could observe what sector needs while a student, so this experience improved me a lot.
- I used **jQuery**, **ASP.NET Core MVC**, **React.js**, and **Git**.

FEATURED PROJECTS

El Poder Del Amor

The El Poder Del Amor Mobile App is the official mobile application of the television program "Kismetse Olur". This application provides greater engagement and interaction opportunities for the dedicated viewers of the program. It has reached over one million downloads, reaching a large audience. The Mobile App allows users to vote for their favorite contestants, watch program episodes within the app, assess compatibility using the Mamacita artificial intelligence system, and foster interactions among users through its matchmaking feature, providing an enriched and interactive experience for the viewers. The app is downloaded by more than 1 million people.

5S Inspection

I worked with the team at BEST company, developing a web-based, mobile-friendly inspection system using ASP.NET Core MVC and JQuery. The project was planned in collaboration with industrial engineers. Through this project, workshops could undergo various inspections through the application. The results were presented to the stakeholders in the form of graphical reports. This led to an increase in the efficiency of the factory."

Simple Kitchen

The Simple Kitchen website was built using React.js. It includes a landing page that provides information about the company and a section where users can create accounts (including user information and addresses) and order a trial package. Formik was utilized for the form sections."
